Return Statements

- Can only be used inside a function
- After Python executes the return statement, Python will exit the function
- Can have multiple return statements in the same function, but only some will be actually used

Announcements

- Project 1 due today!
  - If you're working with a partner, only one person should submit, and make sure that you *both* add each other as partners on okpy
- Midterm is Friday 3/13 from 7-9PM
  - Fill out conflict form by today if you have a conflict!
- Midterm Review will be on 03/11 from 6-8PM in 10 Evans & 2050 VLSB
